## Professional Experience

### Front End Developer                                     2022-05 - Present
ParamTech Software Company

**Duties/Responsibilities**

- Developing features for the company's super app, with a focus on the lump sum payment and reporting module.
- Creating a reusable component library to streamline development across different projects.
- Collaborating with UI/UX designers to provide a technical perspective and ensure a seamless user experience.
- Translating design wireframes into functional code using tools like Figma and Ant Design.
- Designing and building large-scale projects that meet project standards for JavaScript development.
- Working closely with UI/UX designers to bridge the gap between design and technical implementation.
- Building and maintaining landing pages for the company's websites, including one built from scratch.
- Integrating CMS systems like Contentful, Strapi CMS, Sanity CMS and Netlify CMS to improve content management and delivery. Spending good amount of experience in almost every possible JAMSTACK.
- Improving continuous deployment and integration pipelines to ensure seamless and efficient development processes.

### Business Analyst                                        2021-06 - 2022-05
Vektora Software Company

**Duties/Responsibilities**

- Responsible for PM (Plant Maintenance) module
- Taken active role in Turkey's one of the biggest SAP project. (Sanko)

## Projects

- **Developed the 'Kredim ile Öde' Application:** Took full responsibility in developing a third party checkout payment application in collaboration with Akbank, enabling users to make payments using my company's own product, Kredim, through Akbank platforms.
- **BNPL, KYC, Posrapor, Netekstre:** Played a pivotal role in identifying and addressing customer needs within our flagship apps, including Kredim, Param, and Finrota.
- **Back-Office:** Played an active role in the development of the company's back-office project.
- **Typescript Refactor of 'Payment Module' in Finrota App:** Played a key role in transforming the legacy code of payment module which was initially written in JavaScript into TypeScript.
- **E-Fatura**: Spearheaded the development of an e-billing application using React.js and Redux. This app empowered company accountants to efficiently manage, track, and report bills.
- **Case Api:** Developed a full stack Next.js App which provides both an cross-origin-api and ui to test the api endpoints for the frontend case we send to applicants at our company. The application contains Next.js APIs that can work across origins, allowing candidates to test and consume the APIs in their case projects through a frontend interface similar to Swagger.

- Website Development with various CMS Platforms: Integrated various CMS systems (ContentfulCMS, Strapi CMS) into company's and also it's sub-companies' landing pages while also developing them using Next.js 13++. Took the lead in crafting our company's brand-new website using Next.js in conjunction with Contentful CMS. Explore the result at ParamTech Website.
- Mobile Responsiveness Transformation: Successfully transformed one of our banking web applications into a fully mobile-responsive platform. Isube Banking.
- Next.js and Typescript Website Development: Designed and developed various company websites using Next.js and Typescript, ensuring a modern and efficient web presence. Examples include Param EU and Param UK.
- Gatsby.js Blog & Landing Page: Created an engaging blog and captivating landing page using Gatsby.js and Netlify CMS. Discover the content at Blog.
- Next.js, Three.js, and Tailwind Landing Page: Crafted a visually appealing landing page using Next.js, Three.js, and Tailwind CSS. View the design at Oblomov Media Landing Page.

## Education

### The Last Algorithm Course You'll Ever Need
2024-01 - Present
